

Embedded Firmware Developer (m/f)

A young, med.-tech. specialized company in the heart of Vienna is actively looking for talent to support their mission!

The company is striving for a better accessible healthcare system for the whole society. They have elaborated methods and technologies, which are already providing significant advantages compared to traditional medical analysis processes (speed, quality, price, etc.).

If you want to work in a flexible and modern environment, with highly skilled and open minded colleagues incl. Home-office possibilities + diverse social benefits (vienna card, food & drinks in the office + free coffee ;)). Then this is the perfect company for you!

Tasks:

- Defining and evolving the companies' embedded system strategy
- Solving of challenging problems in the healthcare market using innovative solutions
- Design, development, maintainance of the embedded firmware (using Linux, C++, Qt)
- Testing the firmware inside of the complete system
- Improving the firmware system under the condition of high quality standards
- Collaboration with external suppliers
- 2-3 days travel / month (outside of Austria)

Requirements:

- Master's degree or higher education degree in Computer Science, Mechatronics, Electrical Engineering / Electronics
- > 1 year of hands-on professional experience in firmware programming in a firmware architecture (C++, Qt | Linux, ARM)
- Well understanding of software patterns, clean coding and clean architecture
- Well organized, with an eye for details, accuracy and well-structure
- Resilient and calm working attitude, even when things go bad
- Fluent in English

The Offer:

- A young, dynamic team of experts and venture-capitalists in Europe and the US
- Building next-generation healthcare solutions from scratch and participating on its progress
- Flat-hierarchy, flexible working hours, home-office
- A nice office in the 1st district with free coffe, fruits, etc.
- Vienna transit card
- Team acitvities (sport, retreats, etc.)
- A competetive salary, which starts at €50.000
